Lab 4

Tasks:

1. Create a folder on your computer call "**FirstnameLastNameLab4**", for example
   "**JohnSmithLab4**". You will use this folder to contain your website files.
2. Download the hangman.zip file, copy and paste the files into your lab folder.
3. Use a texteditor to open the index.html, fill in the blanks under each comment.
4. Open styles.css in a text editor. Add the css properties to the .submit-box with
   width of 35%, height of 20%, margin of 0, display is flex and justify-content is center;
5. In the styles.css file, add hover on the submit bottom. The background-color is **red**, cursor is
   **pointer**, transition is **background-color ease-in-out 0.5s .**
6. Open the hangman.js file with a text editor, Inside ready function, add a click event listener with
   the .btn-submit box. When the user click the .btn-submit box, count variable will increase with
   one, the submit function with count and maxCount will be called.

Submit your solution on the Blackboard.
